

STAND-ALONE “VINOLOK” APPLICATOR

Bottling technology
www.costral.fr

Our solutions for Vinolok glass stoppers, an innovation made by Costral that adapts easily to your machines.

Stand-alone and automatic Vinolok application device with:

- Inert gaz injection in the bottle head-space before closing
- Rotary 5-position dispensing of the glass stopper on the bottle
- Plugging-in-head of the Vinolok stopper

TWO SIMPLE INSTALLATION SOLUTIONS:

A separate and automatic distributor for your glass stoppers types, «Low Top» Ø 18,5 mm or «High Top» Ø 18,5 or 21,5 mm.

This Applicator is carried on a stainless steel foot, with mobile and easy-to-use control panel, adjustable support for the height of the dispensing and plugging-in head.

Bottles driven thanks to a motorized Archimedes screw, complete vibrating distributor with hopper, automatic dispenser with pushing system and an external foot.

A complete system, from supply to application

- Vibrating distributor dedicated to the Vinolok application
- Presence control of Vinolok stopper
- Output up to 4000 BPH
- Automatic corking equipment
- Seal integrity respect
- Integrated safety shielding

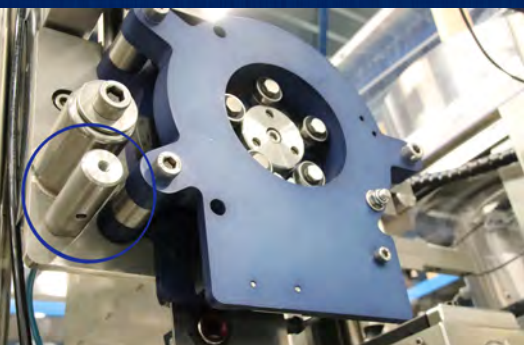

Or

A distributor with a complete equipment integrated into a **COSTRAL** machine (or another machine on request).

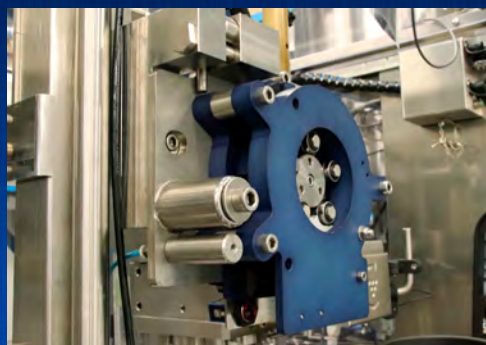

A complete installation with hopper, CO2 sweeping, vibrating distributor, feeding canal in aluminum with hinge for automatic setting of heights and stopper presence control, rotating capping-head with 5 positions.

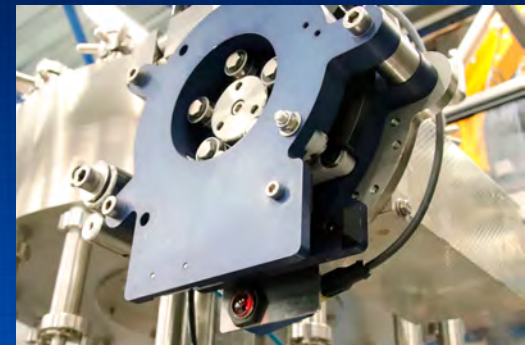

Vinolok equipment to integrate in a monobloc

Inert gaz solution for the head-space

Application pressure adapted to the Vinolok stopper

The speed at which the stoppers are placed is synchronized with the machine's outlet (up to 4000 BPH)
